

C1
cont.

uniform crimps along the length thereof, said crimps extending on both sides of said tubular body and having a crimp frequency of no less than about 6 crimps per centimeter.

C2

D

D

6. (Amended) A woven textile graft comprising:

an elongate tubular graft body having a wall, said wall having a thickness of no greater than about 0.16 mm and defining a pattern of wave-like crimps extending along both sides of said tubular body, the number of crimps, C , per centimeter of body length being defined by the equation:

$$C = [2 (t + 10)]^{-1} ;$$

wherein t equals the body wall thickness in mm.

1

Claim 7, line 3, delete "0.6" and substitute therefor --0.5--.

C3^D

11. (Amended) A woven textile intraluminally implantable graft comprising:

an elongate tubular graft body having a wall, said wall having a thickness of dimension such that the graft body [may be] is capable of being ^{radially} ~~radially~~ compressed for insertion into a delivery catheter;

said tubular graft body having a plurality of longitudinally spaced wave-like crimps along the length thereof on both sides of said tubular body[;

said tubular graft body including a plurality of wave-like crimps along the length of said tubular body], said wave-like crimps defining a crimp frequency of no less than 8 crimps per cm.
